My name is **Giselle Barragán Sánchez**, and I'm a member of the class of 2026. I like to play video games, mainly fighting, rhythm, and open-world games like VrChat. I also like metal (heavy metal and death metal mainly). I got into it around November 29, 2021. I usually go outside with my dog, Luna. Another thing I like is Ouji fashion, anime, and horror movies. Halloween and Scream are my favorites.

What I hope to do after high school is to go into the field of forensic science and someday become a CSI worker or anything related to learning about investigations. What I find the most intriguing about forensic science is studying human anatomy and I would like to investigate a crime scene someday. 🐱🐱🐱

**"Love Dive"**

sink into my heart, love dive. deep as the late-night drives  
 with nature just passing by, looking deep into her eyes  
 none of us wonder why, as we strive to the dark skies  
 sink into my heart, love dive.  
 i don't know why we're like this  
 that kiss that you gave me was bliss  
 even if we both feel like this, we know that it was a mistake.  
 we don't know how to express our feelings  
 i just wanted to show affection but i didn't know  
 we would have a real connection.  
 is it ok?! are you ok? don't think i tried to play you  
 i didn't have a clue what I was getting into.  
 you're feeling gray, i can see it.  
 even if you might hate me i still wanna be  
 the light of our days here.  
 as we went back, you reminded me of a lilac.  
 the memories of the old us came back,  
 being with you felt like destiny.  
 we were so precious in love  
 and the chemistry was like never before.  
 remember when we were like this we've never  
 felt this feeling before if feels her  
 when i'm with you, i feel euphoric  
 . as we go back to the old times,  
 sink into my heart, love dive.

### “Moon and Shadows”

I loved...  
 Saw the way the moon would shine with them.  
 So ethereal, so precious  
 With the look in their eyes, a glint of hope...  
 While I watched from the shadows.  
 Hoping they'd notice, they'd see,  
 That even the darkness, where shadows like there can be...  
 That hopefully the moon doesn't turn them against me....  
 For there's light, even within the shadows, that the moon can reach.  
 If they can see what I see. They'd love it too.

### **“The Gem Called Love”**

There's love that's rare.  
Such, it would be a gem  
hidden.  
It must be searched for.  
It can be one owned by all.  
But love requires trust,  
Vulnerability, and hope.  
Some experience hurt, and  
heartbreak.  
So, love must rot.  
But there's those, oh, so,  
daring.  
They keep faith and learn  
along the way.  
For the truest love is known  
By these,  
With a glimmer and smile on  
their hearts.  
For hurt and heartbreak  
might come,  
But these soldiers, that dare,  
have seen,  
Have felt the love...  
That's called - Rare.

**“The human mind is the scariest thing of all...”**

For it thinks too much...

And sometimes doesn't think at all.

It is supposedly right,  
yet the facts don't add up.

We believe this truth  
But what do we know at all?

Two for one.

Creative and logical.

Both act together?

Yet, which is in charge.

The human mind is one of the largest anomalies.

It has not been solved.

To try is to fail... again and again.

So beware of the human mind....

Don't fear it. No.

Just have a cautious thought when entering the full extent of  
The Human Mind.
